NOTES TO FINANCIAL STATEMENTS**(1) Summary of Significant Accounting Policies****(a) Basis of Presentation**

The accompanying statutory financial statements of the Company have been prepared in accordance with accounting practices prescribed or permitted by the Commissioner of Insurance of the Commonwealth of Puerto Rico (the Commissioner of Insurance), which is a comprehensive basis of accounting other than U.S. generally accepted accounting principles. The Company adopted the National Association of Insurance Commissioners' statutory accounting practices (NAIC SAP), as the basis of its statutory accounting practices, as long as they do not contradict the provisions of the Insurance Code of the Commonwealth of Puerto Rico (the Insurance Code) or the Circular Letters issued by the Commissioner of Insurance.

The Commissioner of Insurance has the right to permit other specific practices that may deviate from prescribed practices. Prescribed statutory accounting practices (SAP) include a variety of publications of the National Association of Insurance Commissioners (NAIC) including its codification initiative contained in its accounting practices and procedures manual, as well as state laws, regulations, and general administrative rules. Permitted statutory accounting practices encompass all accounting practices not so prescribed. The Commissioner of Insurance has adopted certain permitted accounting practices that differ from those found in NAIC SAP. However, differences adopted by the Commissioner of Insurance do not have a significant effect on the net income and statutory capital and surplus of the Company.

(b) Nonadmitted Assets

Certain assets designated as nonadmitted assets have been excluded from the statutory statements of admitted assets, liabilities, and capital and surplus by a charge to unassigned surplus.

The nonadmitted assets charged to unassigned surplus during 2010 and 2009 are as follows:

	2010	2009
Receivables and advance to providers	\$ 666,997	463,801
Prepaid expenses	5,370	47,834
Deferred tax asset	162,610	52,378
	<u>\$ 834,977</u>	<u>564,013</u>

(c) Use of Estimates

The preparation of the statutory financial statements requires management of the Company to make estimates and assumptions relating to the reported amounts included in the statutory financial statements and accompanying notes. The most significant items subject to estimates and assumptions are the actuarial determination for liabilities related to medical costs, the Company's estimated risk adjustment payments receivable from CMS, and certain amounts recorded related to the Part D program. Actual results could differ from these estimates.

(d) Recognition of Premium Revenue

Premium revenue is recognized as revenue over the period in which service or benefits are obligated to be provided. The Company recognizes premium revenue for the Part D payments received from CMS for which it assumes risk. The Company does not record revenue related to Part D payments from CMS that represent payments for claims for which it assumes no risk (see note 4).

Substantially, all revenues recognized by the Company are received from CMS and from the Commonwealth of Puerto Rico Health Insurance Administration (ASES by its Spanish acronym). Revenues are recognized ratably over the period of coverage based on anticipated CMS and ASES reimbursement rates, number of enrollees, and expected Medicare and Medicaid eligibility status. Actual amounts received from CMS and ASES are subject to adjustment based on subsequent review of members' eligibility or retroactive adjustments of reimbursement rates. An estimate is made of such retroactive adjustments based on historical trends, premiums billed, number of members, expected eligibility, and other information. Retroactive membership adjustments result from enrollment changes not yet processed, or not yet reported by CMS. Changes in revenues from CMS resulting from the periodic changes in risk adjustment scores for the Company's membership are recognized when the amounts become determinable and the collectability is reasonably assured. Such estimates are regularly reviewed and updated, and any resulting adjustments are included in the current year's results.

(e) Cash, Cash and Equivalents, and Short-Term Investments

The Company considers all highly liquid investments with original maturities of three months or less to be cash equivalents. Short-term investments are defined as short-term highly liquid investments with remaining maturities of one year or less (excluding those investments classified as cash equivalents). Short-term investments having an

NOTES TO FINANCIAL STATEMENTS

original maturity of less than one year are stated at cost. At December 31, 2010 and 2009, cash and cash equivalents consisted of cash deposited in financial institutions and money market funds amounting to approximately \$5,417,324 and \$15,588,046, respectively. At December 31, 2010 and 2009, there were cash equivalents amounting to \$2,022,550 and \$365,058, respectively. At December 31, 2010 and 2009 there were no short-term investments.

(f) Investment Securities

Debt securities, mutual funds, and equity securities are valued in accordance with rules promulgated by NAIC. Bonds and notes eligible for amortization under such rules and nonredeemable preferred stocks are stated at amortized cost. Equity securities are carried at estimated fair value. Adjustments reflecting the unrealized appreciation or depreciation of equity securities are shown as a component of surplus, net of tax and are not included in the determination of the net gain from operations.

Realized gains or losses on the sale of investments are included in operations and are derived using the specific-identification method for determining the cost of securities sold. Interest and dividend income is recognized when earned.

A decline in the fair value of any security below cost that is deemed to be other-than-temporary impairment (OTTI) results in a reduction in carrying amount to fair value. The impairment is charged to operations and a new cost basis for the security is established. To determine whether an impairment is other-than temporary, the Company considers all available information relevant to the recoverability of the security, including past events, current conditions, and reasonable and supportable forecasts when developing estimate of cash flows expected to be collected. Evidence considered in this assessment includes the reasons for the impairment, the severity and duration of the impairment, changes in value subsequent to year-end, and forecasted performance of the investee.

Premiums and discounts on debt securities are amortized or accreted over the life of the related security as an adjustment to yield using the effective-interest method. Such amortization and accretion is included in the investment income line item in the accompanying statutory statements of revenue and expenses. Dividend and interest income are recognized when earned.

The Company's investments are exposed to three primary sources of risk: credit, interest rate, and liquidity risk. The financial statement risks, stemming from such investment risks, are those associated with the determination of estimated fair values, the diminished ability to sell certain investments in times of strained market conditions, the recognition of impairments and the recognition of income on certain investments. These financial statement risks may have a material effect on the amounts presented within the statutory financial statements.

(g) Fair Value Measurements

On January 1, 2008, the Company adopted an accounting standard issued by the Financial Accounting Standards Board related to fair value measurements of financial assets and financial liabilities and for fair value measurements of nonfinancial items that are recognized or disclosed at fair value in the financial statements on a recurring basis. This standard defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. This standard also establishes a framework for measuring fair value and expands disclosures about fair value measurements. The adoption of this standard resulted in additional disclosures included in note 5 and did not have any impact on the Company's financial position, results of operations, or cash flows.

On January 1, 2009, the Company adopted a provision of this standard for all nonfinancial assets and nonfinancial liabilities that are recognized or disclosed at fair value in the financial statements on a nonrecurring basis. The adoption of this provision did not have any impact on the Company's financial position, results of operations, or cash flows.

The carrying amounts of cash and cash equivalents, short-term investments, receivables, accounts payable, and accrued liabilities approximate fair value because of the short-term nature of these instruments and should be collected or paid within 12 months after year-end.

The fair value of the investment securities is based on quoted market prices for those or similar investments. Additional information on the fair value of investments is included in note 5.

(h) Medical Claim Liabilities and Medical Costs and Claims

Medical claim liabilities are accrued as services are rendered, including claims in process and an estimate for claims incurred but not yet reported, which is determined based upon an actuarial analysis of the Company's historical claim payment patterns, management estimates, and other statistics. In addition, the Company contracts with various service providers, which are compensated based on a capitation basis. Expenses related to these providers, which are based in part on estimates, are recorded in the period in which the related services are rendered.

The medical claim liabilities are necessarily based on estimates and, while management believes that the amounts are adequate, the ultimate liability may be in excess of or less than the amounts provided. The methods for making such estimates and for establishing the resulting liability are continually reviewed, and any adjustments are reflected in the statutory statements of revenue and expenses of the current period. The actual results could differ materially from the amount recorded in the statutory financial statements of the Company.

NOTES TO FINANCIAL STATEMENTS

Medical costs and claims consist of claim payments, capitation payments, risk sharing payments, and pharmacy costs, net of rebates, as well as estimates of future payments of claims provided for services rendered prior to the end of the reporting period. Capitation payments represent monthly contractual fees disbursed to physicians and other providers who are responsible for providing medical care to members. Risk-sharing payments represent amounts paid under risk-sharing arrangements with providers, including independent physician associations. Pharmacy costs represent payments for members' prescription drug benefits, net of rebates from drug manufacturers. Rebates are recognized when the rebates are earned according to the contractual arrangements with the respective vendors. Premiums the Company pays to reinsurer are reported as an off-set to premiums, and related reinsurance recoveries are reported as reductions from medical expenses.

(i) Income Taxes

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. Under SAP, the amount permitted to be recognized is more restrictive, and the effect on deferred tax assets and liabilities of a change in tax rates is recognized in the accompanying statutory statements of changes in capital and surplus in the period that includes the enactment date.

During 2009, a statutory accounting standard that revised statutory accounting for deferred income taxes became effective. This standard requires a statutory valuation allowance for deferred tax assets and also increases the admissibility of deferred tax assets. The Company reviews its deferred tax assets for recoverability and establishes a valuation allowance based on historical taxable income, projected future taxable income, applicable tax strategies, and the expected timing of the reversals of existing temporary differences. A valuation allowance is provided when it is more likely than not that some portion or all of the deferred tax assets will not be realized. This statutory accounting standard did not have impact on the Company's statutory financial statements.

Tax credits purchased are initially recorded at cost. Gains on tax credits are deferred until the value of the tax credits utilized exceeds its cost. Losses on tax credits are recognized when known. Gains and losses on tax credits are reflected in other income in the accompanying statutory statements of revenue and expenses.

The Company is subject to Puerto Rico income taxes as an other-than-life insurance entity. Other-than-life insurance entities are taxed essentially the same as other corporations with taxable income determined on the prescribed statutory accounting practices. Also, operations are subject to an alternative minimum income tax, which is calculated based on a formula established by the existing tax laws. Any alternative minimum income tax paid may be used as a credit against the excess, if any, of regular income tax over the alternative minimum income tax in future years.

The Company accounts for uncertainty in income taxes by prescribing a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This standard also provides guidance on derecognition, classification, interest and penalties, and disclosure. The Company recognizes interest and penalties relating to uncertain tax positions in income tax expense.

(j) Treasury Stock

The Company records treasury stock purchases under the cost method whereby the cost of the acquired stock is recorded as treasury stock.

The Company regularly monitors and evaluates the difference between the cost and estimated fair value of investments. For investments with a fair value below cost, the process includes evaluating the length of time and the extent to which cost exceeds fair value, the prospects and financial condition of the issuer, and the Company's intent and ability to retain the investment to allow for recovery in fair value, among other factors. This process is not exact and further requires consideration of risks such as credit and interest rate risks. Consequently, if an investment's cost exceeds its fair value solely due to changes in interest rates, impairment may not be appropriate. If after monitoring and analyzing, the Company determines that a decline in the estimated fair value of any fixed income or equity security below cost is other than temporary, the carrying amount of the security is reduced to its fair value. The impairment is charged to operations, and a new cost basis for the security is established. No impairments were identified nor recognized by the Company during the years ended December 31, 2010 and 2009.

The unrealized losses in fixed income securities as of December 31, 2010 were caused principally by the increased market volatility and changes in interest rates. Because the Company has the ability and intent to hold these securities until a market price recovery or maturity, these investments are not considered other-than-temporarily impaired. The Company has assessed each position for credit impairment.

The amortized cost and estimated fair value of debt securities at December 31, 2010 by contractual maturity are shown below. Expected maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

NOTES TO FINANCIAL STATEMENTS**(9) Income Taxes**

The income tax expense differs from the amount computed by applying the Puerto Rico statutory income tax rate of 38.2% in 2010 and 41.0 % in 2009 to the income before income taxes as a result of the following:

On November 15, 2010, the Commonwealth of Puerto Rico passed Law No. 171. This law gives corporations that complied with Christmas bonus requirements, a seven percent (7%) tax credit based on the regular tax, surtax and recaptured amounts but, will not be allowed against the alternative minimum tax. For the year ended December 31, 2010, the effect of this tax credit was a decrease to the Company's statutory income tax rate by approximately 270 basis points.

On March 9, 2009, the Government of Puerto Rico signed into law Act No. 7, *Special Act Declaring State of Fiscal Emergency and Establishing an Integrated Fiscal Stabilizing Plan to Save the Credit of Puerto Rico*. The plan is organized with revenue generating measures, permanent and temporary, cost reducing, and financial measures. Among the tax related measures, the law affects corporations operating in Puerto Rico by requiring a five percent (5%) surtax over the determined tax liability. These measures are effective for tax years commenced after December 31, 2008 and before January 1, 2012. For the year ended December 31, 2010 and 2009, the effect of this surcharge was an increase to the Company's statutory income tax rate by approximately 195 basis points.

On January 31, 2011, the Governor of Puerto Rico signed into laws the Internal Revenue Code for a New Puerto Rico (the "New Code"). This law replaces the Puerto Rico Internal Revenue Code of 1994, as amended ("1994 Code"), and as the latter one it covers the Puerto Rico income tax, gift and estate tax, sales and use tax, excise tax, liquor tax and their administrative provisions. The New Code retains the twenty percent (20%) regular income tax rate but establishes significant lower surtax rates and eliminates the five percent (5%) additional surtax described above established by Act No. 7. Under the New Code, the maximum rate will be 30% unless the Company makes a decision to apply the provisions of the 1994 Code for a period of 5 years, in which case the 30% would be applicable after the 5 year period.

Deferred income taxes reflect the tax effects of temporary differences between carrying amounts of assets and liabilities for financial reporting purposes and income tax purposes. The deferred tax asset at December 31, 2010 and 2009 of the Company is composed of the following:

	2010	2009
Deferred tax asset on nonadmitted assets	275,334	209,514
Less nonadmitted deferred tax asset	(162,610)	(52,378)
Admitted deferred tax asset	<u>\$ 112,724</u>	<u>157,136</u>

Under SAP, gross deferred tax assets generally are admitted to the extent the Company's income taxes paid in prior years that can be recovered through loss carrybacks; plus the lesser of (a) the amount of gross deferred tax assets expected to be realized within one year after year-end (changed to within three years under the new statutory accounting standard at December 31, 2010), or (b) 10% (increased to 15% under the new statutory accounting standard at December 31, 2010) of statutory capital and surplus as of year-end; plus any remaining deferred tax assets that can be offset against existing gross deferred tax liabilities.

The change in deferred income taxes during 2010 and 2009 amounted to (\$65,820) and \$140,803, respectively, and was (credited) charged directly to unassigned surplus.

During 2009, the Company purchased and used tax credits amounting to \$2,845,000 to reduce the income tax payable; the Company realized approximately \$268,000 in benefits on the purchase of these tax credits, which were recorded as other income in the accompanying statutory statement of revenue and expenses for the year ended December 31, 2009.

NOTES TO FINANCIAL STATEMENTS

Unrecognized tax benefits result from income tax positions taken or expected to be taken on the Company's income tax returns for which a tax benefit has not been recorded in the Company's statutory financial statements. For the years ended December 31, 2010 and 2009, there were no unrecognized tax benefits.

The Company's policy is to recognize interest and penalties relating to uncertain tax positions in income tax expense. For the years ended December 31, 2010 and 2009, there was no interest or penalties accrued relating to income taxes.

The Company files its income tax return with a statute of limitation. In the normal course of the business, the Company is subject to examination by various taxing authorities. As of December 31, 2010, the Company is subject to income tax examinations for the fiscal tax years ended in 2006 through 2010.

(10) Information Concerning Parent, Subsidiaries and Affiliates and Other Related Parties

The Company maintains a management services agreement which provides certain management, infrastructure support, consulting, and implementation services in the development and operation of the Company in Puerto Rico. Management fees are based on 120% of Holdings monthly operating expenses. Holdings charged the Company approximately \$36,710,000 and \$39,768,000 during the years ended December 31, 2010 and 2009, respectively, for management services, which are presented within the general and administrative expenses in the accompanying statutory statements of revenue and expenses.

On August 1, 2009, the Company entered into a delegation agreement with MSO of Puerto Rico, Inc. (MSO), an affiliate, to provide management and administrative services with respect to the network of physicians and other healthcare providers contracted by the Company in exchange for a management fee. The delegation agreement terms include a fixed and variable component. The fixed component is determined based on a fixed percentage (4%) of the total premiums earned by the Company. The variable component is the 25% of the Surplus as contractually defined in the delegation agreements. During 2010 and 2009, MSO charged the Company approximately \$27,903,000 and \$11,728,000, respectively, of which \$20,410,000 and \$8,646,000 (fixed component) and \$7,492,000 and \$3,082,000 (variable component), respectively, are included in general and administrative expenses and medical costs and claims, respectively, in the accompanying statutory statements of revenue and expenses.

The amounts due to and due from parent company and affiliates at December 31, 2010 and 2009 are noninterest-bearing.

(a) Legal Matters

The College of Dental Surgeons of Puerto Rico, on its own behalf and in representation of its members, v. Triple S Management Inc. The College of Dental Surgeons of Puerto Rico filed a putative class action complaint before the Court of First Instance in San Juan, Puerto Rico, on its own behalf and on behalf of its members in the Commonwealth of Puerto Rico, against 24 payors licensed in the Commonwealth of Puerto Rico, including the Company. The complaint alleges that the Company, among other payors, in violation of various state laws and statutes engaged in the following actions: (a) imposing unilateral cancellation clauses in their provider contracts, which were then used against the dentists in the event that the dentist contested the payor's payment schedules; (b) denial of payments for services rendered that allegedly were medically necessary; and (c) unilateral downcoding of claims to underpay the dentists. The plaintiffs allege that the named payors, including the Company, engaged in conduct violating the Racketeer Influenced and Corrupt Organization Act (RICO) constituting a pattern of organized crime with the intent to illegally appropriate funds that belong to the dentists in violation of the state RICO statute. The parties have been engaged in motion practice over whether the action should proceed in federal district court or commonwealth court. That motion practice is ongoing and the parties have not yet engaged in any discovery concerning the merits. The complaint alleges damages of \$150 million against the entire group of defendants but it is not possible now to determine what the Company's share of such amount could be. Although it is too early to make a judgment as to the probability of a favorable or unfavorable outcome, the Company believes that it has valid defenses against these claims, that they are without merit and it is vigorously defending itself against them.

At December 31, 2010, the Company is a defendant in various lawsuits and other claims arising in the ordinary course of business. In the opinion of management, with the advice of its legal counsel, the ultimate disposition of these matters will not have a material adverse effect on the financial position and results of operations of the Company.

From time to time, in the ordinary course of business, the Company denies payments for service based on factors such as medical necessity and failure to meet preauthorization requirements. Certain providers have notified the

NOTES TO FINANCIAL STATEMENTS

Company that they disagree with its determination and have threatened legal action. The Company has included in its medical claims liabilities a provision for the potential payments to these vendors.

(b) Audits from CMS and from the Commissioner of Insurance

Under the terms of the agreement with CMS, the Company is subject to audits of compliance with federal regulations. During 2010 and 2009, the Company was subject to CMS audits. These audits did not have a material adverse effect on the Company's statutory financial statements. Also, during 2008, the Company was subject to an examination of the Commissioner of Insurance covering 2007 and certain prior periods. The findings of these examinations were received in 2010 and did not have a material impact on the Company's financial statements.

(20) Fair Value Measurement

The Company follows an accounting standard for fair value measurements of financial assets and financial liabilities and for fair value measurements of nonfinancial items that are recognized or disclosed at fair value in the financial statements on a recurring basis. During 2009, the Company also adopted the standard for fair value of financial and nonfinancial items recognized or disclosed on a nonrecurring basis. This accounting standard establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to measurements involving significant unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date.
- Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3 inputs are unobservable inputs for the asset or liability.

The following table presents assets and liabilities that are measured at fair value on a recurring basis at December 31, 2010 and 2009:

NOTES TO FINANCIAL STATEMENTS**(21) Other Items**

The Company maintains a contract with CMS to offer MA-PD insurance coverage for medical and prescription drug benefits. The annual contract was renewed effective January 1, 2011.

In general, pharmacy benefits under Part D plans (collectively referred to as Part D plans) may vary in terms of coverage levels and out-of-pocket costs for beneficiary premiums, deductibles, and coinsurance. However, all Part D plans must offer either “standard coverage” or its actuarial equivalent (with the Company’s out-of-pocket threshold and deductible amounts that do not exceed those of standard coverage). These “defined standard” benefits represent the minimum level of benefits mandated by Congress.

The payment the Company receives monthly from CMS generally represents the Company’s bid amount for providing insurance coverage. The Company recognizes premium revenue for providing this insurance coverage ratably over the term of the annual contract. However, the CMS payment is subject to 1) risk sharing through the risk corridor provisions and 2) reinsurance subsidy in order for the Company and CMS to share the risk associated with financing the ultimate costs of the Part D benefit.

The amount of revenue payable to a plan by CMS is subject to adjustment, positive or negative, based upon the application of risk corridors that compare a plan’s revenues targeted in their bids (target amount) to actual prescription drug costs. Variances exceeding certain thresholds may result in CMS making additional payments to the Company (risk sharing receivable) or require the Company to refund to CMS (risk sharing payable) a portion of the payments the Company received. Actual prescription drug costs subject to risk sharing with CMS are limited to the costs that are, or would have been, incurred under the CMS “defined standard” benefit plan (allowable risk corridor costs). The Company recognizes any changes in the risk sharing receivable from or payable to CMS as an adjustment to premium revenue.

Reinsurance subsidies represent payments from CMS for claims the Company paid for which the Company assumed no risk, including reinsurance payments. Claims paid above the out-of-pocket or catastrophic threshold for which the Company is not at risk are all reimbursed by CMS through the reinsurance subsidy for Part D plans offering the standard coverage. The Company accounts for these subsidies as liabilities related to uninsured plans in the statutory statements of admitted assets, liabilities, and capital and surplus and as a financing activity in the statutory statements of cash flows. The Company does not recognize premium revenue or claims expense for these CMS subsidies.

These estimates of amounts due to or from CMS are primarily determined on the prescription drug benefit claim data submitted by plans to CMS in the form of Prescription Drug Event (PDE) data records. The Company used PDE submission reports and data, claims paid data, and actuarial assumptions pursuant to CMS risk sharing and reinsurance guidelines in order to estimate the final settlement amounts due to or from CMS.

The Company recorded at December 31, 2010 a risk sharing payable of approximately \$4,800,000 that is reported as aggregate health policy reserves and a reinsurance liability of approximately \$428,000 (including low income cost-sharing liability of approximately \$14,000) reported as liabilities for amounts held under uninsured plans in the accompanying statutory statements of admitted assets, liabilities, and capital and surplus. The Company recorded at December 31, 2009 a risk sharing payable of approximately \$3,978,000 that is reported as aggregate health policy reserves and a reinsurance liability of approximately \$3,563,000 (including low income cost-sharing liability of approximately \$718,000) reported as liabilities for amounts held under uninsured plans in the accompanying statutory statements of admitted assets, liabilities, and capital and surplus.

The Part D amounts due to or from CMS are necessarily based on estimates and, while management believes that the amounts are adequate, the ultimate balance may be in excess or less than the amount provided. The methodology for making such estimates and for establishing the resulting Part D balances are continually reviewed, and adjustments, if any, are reflected in the current year. The final Part D amounts due to or from CMS are determined within one year after the contract year-end. The Company recorded changes in estimates for Part D amounts due to or from CMS that decreased income before taxes in the amounts of approximately \$617,000 and \$214,000 for the years ended December 31, 2010 and 2009, respectively.

The Company also receives premiums to enhance the drug benefit coverage to Medicaid-eligible members under the Medicare Platino Program sponsored by ASES. At December 31, 2010 and 2009, the Company has receivables from ASES of approximately \$1,232,000 and \$2,156,000, respectively, which are reflected as a component of premium receivables in the accompanying statutory statements of admitted assets, liabilities and capital and surplus.

Pharmacy benefit costs are recognized as incurred. The Company has subcontracted the pharmacy claims administration to a third-party pharmacy benefit manager.

NOTES TO FINANCIAL STATEMENTS**(25) Change in Incurred Claims and Claims adjustment Expenses**

The activity in the medical claim liabilities during the years ended December 31, 2010 and 2009 are as follows:

		2010	2009
Medical claim liabilities at beginning of year	\$	50,910,543	45,923,227
Medical costs and claims:			
Current period insured events		389,593,170	400,373,629

Total incurred		388,561,170	395,243,629
Payment for claims:			
Current period insured events		341,577,652	350,635,173
Prior periods insured events		44,188,527	39,621,140
Total paid		385,766,179	390,256,313
Medical claim liabilities at end of year	\$	53,705,534	50,910,543

The above table shows the components of changes in medical claim liabilities. Medical claim liabilities includes claims in process as well as provisions for the estimate of incurred but not reported claims and provisions for disputed claims obligations. Such estimates are computed using actuarial principles and assumptions that consider among other things, contractual requirements, historical utilization trends and payment patterns, benefit changes, medical inflation, seasonality, membership, and other relevant factors.

Because medical claim liabilities includes various actuarially developed estimates, the Company's actual medical costs and claims expense may be more or less than the Company's previously developed estimates.

The incurred claims for prior period insured events during 2010 and 2009 were lower due to a favorable development of claims liabilities that is attributed to lower-than-expected cost per service and utilization trends.
