1. Summary of Significant Accounting Policies

Triple-S Vida, Inc., (the Company), (formerly known as Great American Life Assurance Company of Puerto Rico), is a wholly owned subsidiary of Triple S Management Corporation (the Parent Company) since January 31, 2006. The Company was incorporated in September 1964 under the provisions of the Insurance Code of the Commonwealth of Puerto Rico (the Insurance Code) and is engaged in the underwriting of life, disability, supplemental health insurance, and the administration of annuities and individual retirement accounts within Puerto Rico and the U.S. Virgin Islands.

On October 19, 2007 the Office of the Commissioner of Insurance of Puerto Rico granted the approval for a change in the corporate name of the Company. On November 1, 2007, the Company changed its name from Great American Life Assurance Company of Puerto Rico to Triple-S Vida, Inc.

This is a statement of the accounting principles and methods applied in preparing these statutory financial statements.

A. Accounting Practices

The Company presents these financial statements on the basis of accounting principles prescribed or permitted by National Association of Insurance Commissioner and the Commonwealth of Puerto Rico. The Company adopted the *Accounting Practices and Procedures Manual* (NAIC SAP) issued by the National Association of Insurance Commissioners (NAIC).

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Life and annuity premiums are recognized as income over the premium paying period of the related policies when collected. Deposits on deposits-type contracts are entered directly as liability when received. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to current operations as incurred.

In addition, the company uses the following accounting policies:

- a) Short term investments are stated at cost.
- b) Bonds not backed by other loans, are stated at amortized cost using the interest method.
- c) Common stocks are stated at market value.
- d) The Company has no preferred stocks.
- e) The Company has no investment in mortgage notes.
- f) Loan backed bonds are stated at amortized cost using the interest method computed using anticipated prepayments at the date of purchase. Prepayment assumptions for loan-backed bonds were obtained from internal estimates. These assumptions are consistent with the current interest rate and economic environment.
- g) The Company owns 100% of the outstanding shares of Atlantic Southern Company.
- h) The Company has no ownership interest in joint ventures.
- i) The Company does not invest in derivative financial instruments.
- j) The Company does not anticipate investment income as a factor in the premium deficiency calculation, in accordance with SSAP No. 54, Individual and Group Accident and Health Contracts.
- k) Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates are continually reviewed, and any adjustments are reflected in the period determined.
- l) The Company has not modified its asset capitalization policy from the prior period.

2. Accounting Changes and Correction of Errors

A. During the current year's annual statement preparation, the Company discovered an error in the presentation of Disability and Death benefits included in the Summary of Operations. Therefore in order to fairly present the balances we reclassified this amount by adjusting lines 10 and 13 of the Summary of Operations for the current and prior year columns to correct for this error.

Although the closing date of the transaction was November 7, 2013, the consideration amount was determined using ASICO's financial position as of October 31, 2013. Therefore, we have recorded a preliminary allocation of the purchase price to ASICO's tangible and intangible assets acquired and liabilities assumed based on their fair value as of October 31, 2013. In addition, domestic life insurance companies are subject to an alternative minimum tax ("AMT"). The AMT is determined at a rate of 30% of the alternative minimum taxable income, which includes an adjustment for 50% of the Company's difference between the pre-tax income determined in accordance with GAAP after certain adjustments, and the regular taxable income.

On July 10, 2009 the Governor of Puerto Rico signed into law Puerto Rico's Act No 37, which requires certain corporations to pay a 5% additional special tax over the tax obligation.

In 2010 the Government of Puerto Rico adopted a comprehensive tax reform in two phases. The first phase of the tax reform was enacted in the last quarter of 2010 and was mostly related to reducing the income tax burden to individuals. In 2010 only, corporations received an income tax credit amounting to 7% of the tax determined, defined as the tax liability less certain credits. The second phase of the reform, which was approved on January 31, 2011, provides for the reduction of the AMT rate from 22% to 20%, including the elimination of the above mentioned 5% additional special tax for corporations.

During 2013 there was a new tax reform that resulted in the approval of Law 40-2013, "Ley de Redistribución de la carga Contributiva. Among the modifications resulting from this law, that have an impact on our operations are, an increase the AMT tax rate from 20% to 30%, and the establishment of a 1% premium tax over net premium revenue reported.

20. Fair Value Measurements

A–C. Included in various investment related disclosures in the statutory financial statements are certain financial instruments disclosed at fair value. Other financial instruments are periodically measured at fair value, such as when impaired, or, for certain bonds and preferred stock when carried at the lower of cost or market.

The Company uses observable inputs when available. Fair value is based upon quoted market prices when available. If market prices are not available, the Company employs internally developed models that primarily use market-based inputs including yield curves, interest rates, volatilities, and credit curves, among others. The Company limits valuation adjustments to those deemed necessary to ensure that the security or derivative's fair value adequately represents the price that would be

NOTES TO FINANCIAL STATEMENTS

received or paid in the marketplace. Valuation adjustments may include consideration of counterparty credit quality and liquidity as well as other criteria. The estimated fair value amounts are subjective in nature and may involve uncertainties and matters of significant judgment for certain financial instruments. Changes in the underlying assumptions used in estimating fair value could affect the results. The fair value measurement levels are not indicative of risk of investment.

The Company's financial assets and liabilities carried at fair value have been classified, for disclosure purposes, based on a hierarchy defined by ASC 820, Fair Value Measurements. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset's or a liability's classification is based on the lowest level input that is significant to its measurement. For example, a Level 3 fair value measurement may include inputs that are both observable (Levels 1 and 2) and unobservable (Level 3). The levels of the fair value hierarchy are as follows:

- Level 1 Inputs are unadjusted, quoted prices for identical assets or liabilities in active markets at the measurement date.
- Level 2 Inputs other than quoted prices included in Level 1 that are observable for the asset or liability through corroboration with market data at the measurement date.
- Level 3 Unobservable inputs that reflect management's best estimate of what market participants would use in pricing the asset or liability at the measurement date.

The level in the fair value hierarchy within which a fair measurement in its entirety falls is based on the lowest level input that is significant to the fair value measurement in its entirety.

The following table presents assets and liabilities that are measured at fair value on a recurring basis at December 31, 2013:
