NOTES TO FINANCIAL STATEMENTS

Note 1 - Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices, Impact of NAIC/State Differences

The accompanying financial statements of AIG Insurance Company – Puerto Rico (the Company or AIGPR) have been prepared on the basis of accounting practices prescribed or permitted by the Insurance Department of the Commonwealth of Puerto Rico (the IDCPR).

Insurance companies domiciled in the Commonwealth of Puerto Rico are required to prepare their statutory financial statements in accordance with the National Association Insurance Commissioners' (the NAIC) Accounting Practices and Procedures Manual subject to any deviations prescribed or permitted by the IDCPR.

Difference between Puerto Rico prescribed or permitted practices and NAIC statutory accounting practices (NAIC SAP) which affect the Company are the deferred income tax arising from temporary difference resulting from contributions to the Catastrophe Loss Reserve. The effect of that item was to increase the policyholders' surplus on the Puerto Rico basis reported in these financial statements over that which would have been reported on the NAIC SAP basis. A reconciliation of the Company's net income and policyholders' surplus between the amount presented in the accompanying financial statements Commonwealth of Puerto Rico basis and NAIC SAP follow:

Description	SSAP #	F/S Page	F/S Line #	12/31/2018	12/31/2017
Net Income, Commonwealth of Puerto Rico basis		4	20	\$ 7,730,850	\$ 315,008

Policyholders' surplus, Commonwealth of Puerto Rico basis		3	37	\$ 93,632,404	\$ 86,753,215

Not recognize deferred tax liability for catastrophe reserve trust fund contributions	N/A	N/A	N/A	(12,492,104)	(12,005,021)
Effect of state permitted practices

B. Use of Estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the amounts reported in these financial statements and notes. Actual results could differ from these estimates.

C. Accounting Policies

Direct, assumed and ceded premiums are earned over the terms of the related policies and reinsurance contracts. Unearned premiums are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct and ceded business and are based on reports received from ceding companies for reinsurance assumed. Premiums receivable are primarily due from agents and policyholders and are charged off when specific balances are determined to be uncollectible. After calculation of non-admitted amounts, an evaluation is made to determine if any allowance for doubtful accounts is required. In the calculation of non-admitted amounts, Puerto Rico regulations (see Note 1A) do not permit the consideration of the unearned premium offset on policyholder balances. The Company writes audit and retrospective business which results in premiums being billed in arrears. Estimates are made of ultimate annual premiums to be paid on these variably priced policies and accruals made for any additional premiums to be collected or refunded. These accruals are reflected within premiums receivable as earned but unbilled premiums or accrued retrospective premiums. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

The Company routinely assesses the collectability of premium receivables. Based upon company experience, any uncollectible premium receivables as of December 31, 2018 are not expected to exceed the non-admitted amounts and, therefore, no additional provision for uncollectible amounts has been recorded. The potential for any additional loss is not believed to be material to the Company's financial position.

Net investment income earned consists primarily of interest, dividends and rent income less investment related expense. Interest is recognized on an accrual basis and dividends are recognized on an ex-dividend basis. Rental income includes an imputed rent for the Company's occupancy of its own buildings. Net realized capital gains (losses) are recognized on a specific identification basis when securities are sold, redeemed or otherwise disposed. Realized capital losses include write downs for impairments considered to be other than temporary.

NOTES TO FINANCIAL STATEMENTS

Note 1 - Summary of Significant Accounting Policies and Going Concern (Continued)

Real estate investments are classified in the balance sheet as properties occupied by the company, properties held for the production of income and properties held for sale. Properties occupied by the company and properties held for the production of income is carried at depreciated cost less encumbrances. Properties held for sale are carried at the lower of depreciated cost or fair value less estimated cost to sell. This value would also be net of any encumbrance. The fair values of properties held for the production of income and held for sale are based upon quoted market prices, if available. If quoted market prices are unavailable, fair values are based upon market appraisals performed every five years using certified valuation techniques. Fair values for these properties will be immediately determined whenever circumstances indicate that the carrying amounts may not be recoverable. Fair values of properties occupied by the company will be measured only if circumstances indicate that the financial condition of the Company is in question.

In addition, the Company uses the following accounting policies:

1. Short-term investments are stated at amortized value using the interest method.
2. Investment grade bonds not backed by other loans are stated at amortized value using the interest method. Investment grade bonds with NAIC designations of 3 through 6 are stated at the lower of amortized value or fair value.
3. As of December 31, 2018 and 2017, the Company had no investments in common stocks, other than in stocks of subsidiary and affiliates.

5. As of December 31, 2018 and 2017, the Company had no mortgage loans on real estate.
6. Investment grade loan-backed securities are stated at amortized value. The retrospective adjustment method is used to value all loan-backed securities. Non-investment grade loan-backed securities are stated at lower of amortized value or fair value.
7. Investments in subsidiary and affiliated companies are stated as follows:

Foreign insurance subsidiary, AIG Seguros Colombia SA and AIG Seguros Mexico investment are not reported as of December 31, 2018 and 2017.

10. The Company does not anticipate investment income when evaluating the need for premium deficiency reserves.
11. Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amounts are adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liabilities are continually reviewed and any adjustments are reflected in the period determined.
12. The Company has a written capitalization policy for prepaid expenses and purchase of items such as electronic data processing equipment, software, furniture vehicles, other equipment and leasehold improvements. The predefined capitalization thresholds under this policy have not changed from those of the prior year.
13. The Company does not write major medical insurance with prescription drug coverage.

D. Reconciliation of Puerto Rico Income Tax Rate to actual effective rate

Puerto Rico income taxes

Property and casualty companies incorporated in the Commonwealth of Puerto Rico are taxed based on net income as computed on the basis of the Company's statutory accounting practices. Such income is adjusted for various temporary and permanent differences, mainly exempt interest income and certain amounts allocated to the write in surplus. The Company is also subject to an alternative minimum tax which is calculated based on a formula established by existing laws.

United States Virgin Islands income taxes

The Company is also engaged in business in the United States Virgin Island (USVI). Any income tax paid in this jurisdiction is taken as a foreign tax credit for Puerto Rico income tax purpose since, as a domestic corporation, the Company is required to report all its worldwide income in Puerto Rico.

The costs of post-retirement benefits are recognized on an accrual basis in accordance with guidelines prescribed by the NAIC. Such guidelines require the recognition of a post retirement benefit obligation for current retirees and fully eligible or vested employees.

Several AIG affiliated companies operating in Puerto Rico sponsor a qualified savings plan under Section 165(a) of the Puerto Rico Income Tax Act 1954, as amended. The plan incorporates a "cash or deferred arrangement, intended to qualify under the income tax laws by which employees may elect to make pre-tax contributions to the Plan. Substantially all regular full-time employees of the Company are eligible to participate on a voluntary basis after completing certain service and age requirements.

Each plan participant is eligible, after three months of service, to make basic contributions the Plan of not less than 1% nor more than 10% of base pay plus overtime and sales commissions or \$15,000 whichever is less, on a pre-tax basis. The Company makes matching contributions of 100% of the first 6% of pay that an employee contributes to the Plan. Also, the Company contributes 3% of pay to all employees, regardless of whether or not an employee is voluntarily participating in the Plan.

Employee Retirement Plan

Employees of AIG, the ultimate holding company, its subsidiaries and certain affiliated companies, including employees in foreign countries, are generally covered under various funded and insured pension plans. Eligibility for participation in the various plans is based on either completion of a specified period of continuous service or date of hire, subject to age limitation.

AIG's U.S. retirement plan is a qualified, non-contributory defined benefit retirement plan which is subject to the provisions of the Employee Retirement Income Security Act of 1974. All employees of AIG and most of its subsidiaries and affiliates who are regularly employed in the United States, including certain U.S. citizens employed abroad on a U.S. Dollar payroll, and who have attained age 21 and completed twelve months of continuous service are eligible to participate in this plan. An employee with 5 or more years of service is entitled to pension benefits beginning at normal retirement age 65. Benefits are based upon a percentage of average final compensation multiplied by years of credited service limited to 44 years of credited service. The average final compensation is subject to certain limitations. The employee may elect certain options with respect to their receipt of their pension benefits including a joint and survivor annuity. An employee with 10 or more years of service may retire early from age 55 to 64. An early retirement factor is applied resulting in a reduced benefit. If an employee terminates with less than 5 years of service, such employee forfeits their right to receive any pension benefits accumulated thus far.

4. Inputs and Techniques Used for Level 2 and Level 3 Fair Values

Assets and liabilities recorded at fair value in the Balance Sheet are measured and classified in a hierarchy for disclosure purposes consisting of three "levels" based on the observability of inputs available in the marketplace used to measure the fair values as discussed below:

- Level 1: Fair value measurements that are quoted prices (unadjusted) in active markets that the Company has the ability to access for identical assets or liabilities. Market price data generally is obtained from exchange or dealer markets. The Company does not adjust the quoted price for such instruments.

NOTES TO FINANCIAL STATEMENTS

Note 20 - Fair Value Measurements (Continued)

- Level 2: Fair value measurements based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals.
- Level 3: Fair value measurements based on valuation techniques that use significant inputs that are unobservable. Both observable and unobservable inputs may be used to determine the fair values of positions classified in Level 3. These measurements include circumstances in which there is little, if any, market activity for the asset or liability. Therefore, the Company must make certain assumptions as to the inputs a hypothetical market participant would use to value that asset or liability.

GENERAL INTERROGATORIES

PART 2 - PROPERTY AND CASUALTY INTERROGATORIES

- 6.1 What provision has this reporting entity made to protect itself from an excessive loss in the event of a catastrophe under a workers' compensation contract issued without limit of loss?
None
- 6.2 Describe the method used to estimate this reporting entity's probable maximum insurance loss, and identify the type of insured exposures comprising that probable maximum loss, the locations or concentrations of those exposures and the external resources (such as consulting firms or computer software models), if any, used in the estimation process.
The Company, along with other affiliated companies, estimates the probable maximum loss by collecting detailed exposures data, running RMS/AIR models to estimate loss distributions, running MetaRisk model and a proprietary application for loss aggregation across various portfolios and CAT reinsurance recovery to derive net loss distribution. The modeling analysis are performed for all regions with material exposures to windstorms and earthquakes, and some key countries to flood where model is available.
- 6.3 What provision has this reporting entity made (such as a catastrophic reinsurance program) to protect itself from an excessive loss arising from the types and concentrations of insured exposures comprising its probable maximum property insurance loss?
The Company maintains an Accident Year Stop Loss coverage to protect the underwriting year from excessive losses arising from natural or man-made catastrophes and to ascertain PML is adequately addressed and covered.
