NOTES TO FINANCIAL STATEMENTS**Note 1 – Summary of Significant Accounting Policies and Going Concern****A. Accounting Practices**

The accompanying financial statements of Chubb Insurance Company of Puerto Rico (the Company) have been prepared on the basis of accounting practices prescribed by the Office of the Insurance Commissioner of Puerto Rico. The Office of the Insurance Commissioner of Puerto Rico requires insurance companies domiciled in Puerto Rico to prepare their statutory financial statements in accordance with the National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures Manual, subject to any deviations prescribed or permitted by the Office of the Insurance Commissioner of Insurance of Puerto Rico.

The only identified difference between Puerto Rico prescribed practices and NAIC statutory accounting practices (NAIC SAP) was observed in the year 2009 with regards to the accounting of the Catastrophic Reserve. NAIC SAP allows the Catastrophic Reserve to be part of the "Restricted Surplus", but legislation in Puerto Rico up until 2009 required the Catastrophic Reserve to be considered part in the Liabilities section and part in the Surplus, as stipulated in Law #227 of 2006 which amended the sections of the Insurance Code which govern the Catastrophic Reserve. Beginning in 2010, the Office of the Insurance Commissioner of Puerto Rico requires the Catastrophic Reserve to be part of the "Restricted Surplus", thus, eliminating the requirement to separate a minimum amount in the Liability section of the Balance Sheet.

Insurers are required to contribute each year to the Catastrophic Reserve until such time as the Reserve exceeds 8% of the 100-year Probable Maximum Loss (PML) for hurricane. For the year ended December 31, 2018, the Company calculated its PML exposure at \$288,389,932. The balance of the Reserve as of December 31, 2018 is \$12,494,047, and the fund earned \$407,372 in interest during the year. Since the 8% of our PML is \$23,071,195. We are making a contribution of \$671,807 during 2019 to comply with the Insurance Commissioner of Puerto Rico.

The Commonwealth of Puerto Rico has adopted certain prescribed accounting practices which differ from those found in NAIC SAP. Specifically, the deferred income tax arising from the temporary difference resulting from additions to the Catastrophe Loss Reserve which are deductible for tax purposes. The Commissioner of Insurance permitted the no recognition of the deferred tax liability resulting from additions to the catastrophe loss reserve that would otherwise have resulted under NAIC SAP. Reconciliation of net income and policyholders' surplus between the amount presented in the accompanying financial statements (PR basis) and NAIC SAP follow:

In October 2017, the NAIC issued temporary INT 17-01 Extension of 90 day rule for the impact of Hurricane Harvey, Hurricane Irma and Hurricane Maria. The interpretation is intended to cover storm-impacted policies for areas in which a state of emergency was declared, including Puerto Rico. Policies in effect the time Federal Emergency Management Agency (FEMA) declared a state of emergency qualify for an additional 60-day extension to the 90-day rule, or a total of 150 days, before the related premium receivable must be designated as "non-admitted". The 60-day extension ended on February 15, 2018 and the INT will automatically nullified on February 16, 2018.

B. Use of Estimates in the Preparation of the Financial Statement

The preparation of financial statements requires management to make estimates and assumptions that affect the amounts reported in these financial statements and notes. Actual results could differ from these estimates.

C. Accounting Policy

Direct, assumed and ceded premiums are earned over the terms of the related policies and reinsurance contracts. Unearned premiums are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct and ceded business, except for accident and health premiums which, due to their short coverage period, are recognized as revenue when due. Reserves for assumed business are based on reports received from ceding companies.

Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions and direct marketing solicitation, are charged to operations as incurred. Additional contingent commissions due to agents are recorded over the period in which related income is recognized under the terms of contracts between the Company and its agents.

Net investment income earned consists primarily of interest earned. Interest is recognized on an accrual basis. Realized capital losses include write downs for impairments considered to be other than temporary.

In the normal course of business the Company seeks to reduce the loss that may arise from events that can cause unfavorable underwriting results by reinsuring certain levels of risks in various areas of exposure with other insurers and reinsurers. The Company's primary reinsurance activity involves assuming and ceding insurance risks through quota share and excess of loss agreements. Reinsurance is ceded primarily to limit losses from large exposures and to permit recovery of a portion of direct losses, although ceded insurance does not relieve the originating insurer of its contingent liability. Risks ceded are treated as risks for which the Company is not liable. The Company would be liable only if a reinsurer fails to meet its obligations under reinsurance agreements. The Company also maintains certain excess loss and catastrophe insurance coverage.

Premiums and commissions related to insurance ceded are accounted for as a reduction of premiums written and acquisition and commission costs, respectively. Reinsurance recoveries are recorded as a reduction of losses and loss adjustment expenses incurred. A reserve is provided for unearned premiums and reinsurance balance receivables with unauthorized reinsurers. Also a reserve is provided for overdue amounts receivable from authorized reinsurers, as defined. Changes in these reserves are charged or credited to unassigned surplus.

Transfers Between Level 2 and Level 3

 - b. There were no transfers from Level 3 to Level 2 during this period
- (3) Policies when Transfers Between Levels are Recognized
- b. There were no transfers from Level 3 to Level 2 during this period
- (4) Description of Valuation Techniques and Inputs Used in Fair Value Measurement
- a. Fixed maturities

We use pricing services to estimate fair value measurements for the majority of our fixed maturities. The pricing services use market quotations for fixed maturities that have quoted prices in active markets; such securities are classified within Level 1. For fixed maturities other than U.S. Treasury securities that generally do not trade on a daily basis, the pricing services prepare estimates of fair value measurements using their pricing applications, which include available relevant market information, benchmark curves, benchmarking of like securities, sector groupings, and matrix pricing. Additional valuation factors that can be taken into account are nominal spreads, dollar basis, and liquidity adjustments. The pricing services evaluate each asset class based on relevant market and credit information, perceived market movements, and sector news. The market inputs used in the pricing evaluation, listed in the approximate order of priority include: benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, reference data, and industry and economic events. The extent of the use of each input is dependent on the asset class and the market conditions. Additionally, given the asset class, the priority of the use of inputs may change or some market inputs may not be relevant. The overwhelming majority of fixed maturities are classified within Level 2 because the most significant inputs used in the pricing techniques are observable. Fixed maturities for which pricing is unobservable are classified within Level 3.

b. Equity securities

Equity securities with active markets are classified within Level 1 as fair values are based on quoted market prices. For non-public equity securities, fair values are based on market valuations and are classified within Level 2. Equity securities for which pricing is unobservable are classified within Level 3.
